PROFESSIONAL SUMMARY

Computer Science graduate working as a Programming Instructor, AI Curriculum Developer and Graphics Designer at E3Empower, and founder of an independent agentic AI consultancy building lead-response and booking automation for local service businesses. Designs and delivers AI and programming curricula from beginner to advanced levels, builds production LLM agents against the Anthropic API, and ships full-stack web applications, with a strong creative foundation in brand identity, graphic design and photography.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript, Java, C++, Bash
- **AI & Agents:** Anthropic API, LLM agent loops, tool use / function calling, memory and RAG, Model Context Protocol (MCP), multi-agent patterns, prompt design, agent evaluation and safety
- **Automation & Integrations:** Gmail API, HubSpot CRM, Facebook lead capture, workflow automation, approval-based human-in-the-loop systems
- **Frontend:** React, HTML, CSS, Tailwind CSS
- **Backend & Databases:** Node.js, SQL, MongoDB, database design, REST APIs
- **Data Analysis:** Pandas, NumPy, Matplotlib
- **Design Tools:** Adobe Illustrator, Photoshop, Premiere Pro, Lightroom; Affinity; Figma; Canva
- **Photography:** Editorial, event, and product photography, shooting and post-processing
- **Tools & Workflow:** Git, GitHub, VS Code, Claude Code, pptxgenjs, automated testing, technical documentation

EXPERIENCE

Founder & AI Automation Consultant

Independent Consultancy

2026 – Present

Arusha, Tanzania

- Founded an agentic AI consultancy focused on lead-response and booking automation for small service businesses, with a phased roadmap toward a productized multi-agent offering.
- Built an end-to-end AI agent that reads inbound client enquiries from Gmail, drafts context-aware replies in the business's own voice, and routes them through a human approval page before sending, with correct email threading and an audit trail of drafted vs. sent replies.
- Delivered the MVP with a 117-test automated suite and verified it end-to-end against live email traffic.
- Running a live pilot with Njiro Studios, a wedding photography business in Arusha, including baseline booking-rate measurement and voice tuning from real past enquiry threads.

Programming Instructor, AI Curriculum Developer & Graphics Designer

E3Empower

Jan 2025 – Present

Arusha, Tanzania

- Lead programming instruction across multiple languages (Python, JavaScript, Scratch, Arduino/robotics), adapting curriculum to learners of different ages and skill levels.
- Designed and built two complete AI courses from scratch: a 10-lesson foundational AI Playground course and a 10-lesson Advanced AI Agents course covering the agentic loop, tool use, memory and RAG, MCP, multi-agent systems, safety and evaluation, and a capstone build.
- Produced the full Advanced AI Agents deck set programmatically with pptxgenjs, with a consistent visual system, Tanzania-relevant examples, and dual tracks for design-led and code-comfortable learners.
- Co-facilitated a four-day Agentic AI Workshop in partnership with the LA Tapestry team for business owners and internal coordinators, producing the schedule, handouts and participant communications.
- Set up a HubSpot CRM integrated with the organization's Facebook page, capturing inbound enquiries as structured contacts through a guided bot flow, replacing ad hoc message handling after boosted-post campaigns.
- Building an online student registration form that writes directly into the existing admission database, replacing paper forms and manual re-entry.
- Facilitate the JA Africa Social Equity Programme (SEP) in Tanzania, delivering sessions and producing the supporting instructional materials.
- Produce graphic design and visual content using Adobe Illustrator, Photoshop, Affinity, Figma and Canva for newsletters, posters, certificates, course materials and internal communications.
- Write and design the organisation's bilingual English/Swahili newsletter, covering tech-hub installations, training programmes and youth-focused initiatives.

- Built a React.js dashboard and a structured set of HTML, CSS and Tailwind exercises now used as teaching resources; developed a Computer Basics course for first-time learners.

Freelance Designer & Digital Marketing Consultant

Self-employed

2024 – Present

Arusha, Tanzania

- Deliver brand identity and social media management for clients, including logo design, typography systems and brand guideline documents.
- Developed the full brand identity for Lindi Gold, a B2B coconut oil company: logo, typography selection and brand guidelines produced in Adobe Illustrator.
- Scope and price recurring visual-content engagements, including an episodic legal explainer series with recurring characters for a law-student client.

Computer Technician (Field Support)

E3Empower partner schools

2025 – Present

Arusha, Tanzania

- Diagnose and repair school computer lab infrastructure, including a failed NComputing vSpace server that was overloading client terminals, resolved through reinstallation and re-registration on an alternative version.
- Produce full technical reports plus condensed management-facing summaries for each intervention.

Intern — Graphic Design & Programming Support

E3Empower

Aug 2024 – Jan 2025

Arusha, Tanzania

- Supported delivery of programming classes and produced design assets for course materials and internal communications.
- Contributed to multiple newsletter editions and created visual identity assets, including prefect certificates and a student collage project.
- Promoted to a permanent role at the end of the internship.

Practical Field Training - Network Trainee

TTCL (Tanzania Telecommunications Co. Ltd.)

Jul 2023 – Sep 2023

Arusha, Tanzania

- Assessed and maintained network operations for residential and business customers.
- Installed and configured communication services on customer sites, troubleshooting connectivity issues alongside engineers.

Volunteer - Programming & Robotics Mentor

E3Empower

Dec 2018 – May 2019

Arusha, Tanzania

- Taught programming fundamentals to young learners using Scratch 3.0 and ran LEGO Robotics and Arduino workshops.
- Developed lesson plans and educational materials tailored to different age groups, with one-on-one coaching.

PROJECTS

Agentic Lead-Response & Booking System

Consultancy Product

Python AI agent built on the Anthropic API that triages inbound client enquiries, drafts replies in the business's voice, and sends them after human approval. Live Gmail read/send with thread continuity, immutable draft history, editable approvals, and 117 passing tests. Piloting with a wedding photography studio, designed to be resold to other local service businesses.

Advanced AI Agents Course (10 lessons)

Curriculum

Three-week advanced curriculum covering the agentic loop, tool use, memory and RAG, MCP, multi-agent systems, safety and evaluation, and a capstone project, delivered as a full programmatically generated deck set with course outline and cloud setup handouts.

Five Star Tourism System

Individual Project

Full-stack travel-booking platform with separate user and admin roles. Users browse and book travel packages and manage bookings; admins manage packages and user accounts.

Repository: <https://github.com/EddieContra/tourism-system>

Library Management System

Individual Project

Application automating library operations, book inventory, member records, borrowing and returns, and overdue notifications, built to improve librarian productivity through a clean interface.

Repository: <https://github.com/EddieContra/LIBRARY--LMS>

Personal Portfolio Site

Individual Project

Portfolio site showcasing development and design work, built and maintained on GitHub Pages.
